Water Heaters

Gold Xi Series (DVE)

Gold Series (DRE)

SETTING THE **GOLD STANDARD** WITH A. O. SMITH

Through an inspired blend of innovation, technology, teamwork and top-level industry expertise, A. O. Smith, presents a full line of state-of-the-art commercial electric water heaters.

Combining outstanding performance with higher-than-ever energy efficiency, A. O. Smith features the Gold Xi Series (DVE) and the Gold Series (DRE) -- the industry's most popular line of commercial electric heaters.

FEATURES AND BENEFITS

THE GOLD XI SERIES (DVE)

- Features advanced electronic control and Goldenrod® elements
- Available with 50, 80, and 119 – gallon storage tank
- Inputs ranging from 6kW to 54 kW
- Can be used as recovery heaters or as boosters for supplying sanitizing rinse water for dishwashing
- Immersion thermostats with adjustable temperature control from 90°F to 190°F

THE GOLD SERIES (DRE)

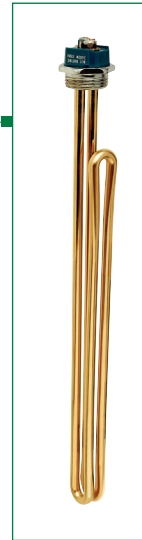

- Standard with Goldenrod® elements
- Combined with surface mounted thermostats
- Available with 50, 80, and 119-gallon tanks as well as various electrical configurations
- Provides hot water when and where you need it

GOOD AS GOLD

WANT TO MAKE SURE YOUR WATER HEATER LASTS LONGER? BOTH THE DRE AND DVE MODELS, COME WITH GOLD-PLATED ELEMENTS THAT RESIST LIME SCALE AND CALCIUM ADHESION AS WELL AS SHEATH TEMPERATURES UP TO 1500°F.

The Goldenrod® element was chosen by A. O. Smith to be a standard feature in the Gold Xi and Gold Series since the value of gold is its unparalleled ability to resist corrosion. With excellent electrical and thermal conductivity, the element ensures long lasting stability within water heaters. Both Gold and Gold Xi models are available with 3, 6, or 9 Goldenrod® elements.

Staggered gold elements allow maximum heat transfer and larger surface area coverage. Since 24-Karat gold elements are standard with Gold and Gold Xi models, corrosion is nearly eliminated through the addition of dual anodes and A. O. Smith's patented ceramic glass lining.

HIGH GRADE A. O. SMITH TANK LINING

A. O. Smith uses a patented liquid slush coating process that assures a tough shield against corrosion and leaks. All surfaces are evenly coated using PermaGlas® Ultra Coat™ process for superior protection.

UL APPROVED FIELD CONVERSION KITS FOR ALL MODELS

A. O. Smith heaters are UL approved on all field conversion kits up to 54 kW input, allowing for various electric configurations to meet every possible need.

OPTIONAL MANIFOLD

A. O. Smith offers optional manifold kits with isolation valves for easy multiple-unit installations.

LCD ADVANCED ELECTRONIC CONTROL WITH REMOTE MONITORING (on Gold Xi models only)

- Fault or alert messages appear if an operational issue occurs for ease of service
 - **iCOMM™** - *An interactive remote monitoring service. The latest technology in commercial water heating that allows you to interact with, proactively manage and monitor your A. O. Smith water heaters from anywhere in the world via the internet. For more information, call 1.888.WATER02.*
