

Spec-tacular News!

Joining the ranks of the most specified family of high-efficiency commercial water heaters, the new Cyclone® XL from A. O. Smith makes the Cyclone product line bigger and better than ever before. The XL model extends the Cyclone family's input range up to 1 million BTU/h while maintaining a compact footprint, and the unit's patent pending stainless steel heat exchange system delivers 97% thermal efficiency. Built to meet most critical load requirements, the Cyclone XL delivers superior performance and the ease of installation Cyclone water heaters are known for. Spec it out for yourself!

97% Thermal Efficiency

Up to 1 Million BTU/h
