

COMMERCIAL-GRADE WATER HEATING MEETS HIGH EFFICIENCY SPACE HEATING

ProLine® XE Combi Boiler

- Easy to install and maintain with a simple design. The unit's cover requires no tools to open, granting easy access to the combustion system, control panel and other components
- Industry-leading domestic hot water delivery up to 4.8 GPM at 77°F temperature rise
- Superior space heating performance with up to 74% more heating capacity than other combi boilers
- 95% AFUE means that the ProLine® XE Combi Boiler is ENERGY STAR® certified and qualifies for many local rebates

Available in three sizes: 110,000, 150,000 and 199,000 BTU/HR

PROLINE® XE COMBI BOILER FEATURES AND BENEFITS

A. O. Smith's ProLine® XE Combi Boiler was designed specifically for the way our customers live and use hot water. We've incorporated three key features to ensure that users have the best possible experience:

- The Preheat Function uses an integrated recirculation pump to ensure that the domestic hot water reaches its target temperature faster.
- The Anticipated Pre-Purge allows the boiler to reignite almost instantly during times of frequent use, preventing cold water sandwiches.
- The Air Handler Interlock prevents cool air delivery while the boiler is in domestic hot water mode to increase user comfort.

ADVANCED ELECTRONIC CONTROL

We've taken steps to make this product easy to install and operate with an advanced electronic control. The LCD display is simple to navigate, providing diagnostic and system information in real words, not codes. The first time you turn on the combi boiler, you'll be led through our Set Up Wizard for quick and easy programming.
