

Amendment to the Hybrid Electric Heat Pump Water Heater Use and Care Guide

The clearance requirements on pages 9 and 11 of the Residential Hybrid Electric Heat Pump Water Heater Use and Care Guide have been restated as follows:

Minimum Required Clearances			
Rear	Left Side	Right Side	Top
0"	0"	3"	6"

50-gallon models may need to be rotated clockwise slightly to provide clearance for the condensate drain elbow. This is not necessary for the 66 or 80-gallon models.
