**A. O. SMITH: THE COMPANY**

A. O. Smith has been setting new standards for India’s water heater industry.

A. O. Smith India Water Heating Private Limited was established in 2006. Since then, the A. O. Smith team has conducted numerous focus group studies and spent endless research hours determining what India wanted in a water heater. Backed by 75 years of proven technological advances, A. O. Smith India has created a stylish design with features demanded by the Indian consumer.

The A. O. Smith plant with manufacturing facilities spread over 76,000 sq. ft. is located on 20 acres, just outside Bengaluru, in the KIADB Industrial Area, Harohalli. The India operations is the 16th A. O. Smith manufacturing facility worldwide. A. O. Smith’s India plant has extensive engineering and technical resources and has the latest technologies incorporated. A. O. Smith is the first manufacturer to invest in and produce glass-lined water heaters in India.

Today, A. O. Smith Corporation is one of the largest water heater manufacturers in the world and is a global leader in innovative technology and energy efficient solutions.

### A. O. Smith ColourMatch System®

The product of your choice comes with either white or ivory body colours, along with the same coloured front panels.

The A. O. Smith ColourMatch System® allows your water heater to match the colours of your bathroom. Call the A. O. Smith Customer Care Centre (1.800.103.2468) to register your product within 60 days of purchase and ask for one of the Decorative Front Panel colour options which will be delivered to you at no cost. This option is available only once, on a purchase.

Colours shown are only indicative and may vary from actual colours available.

### Key Features

1. **WIRED REMOTE CONTROLLER**
   - Displays the temperature and the total energy consumed by the water heater. Temperature can be precisely set between 25°C to 75°C. It is easy to operate the water heater with wired remote controller even if it is placed in an enclosed area by connecting with an approximately 8 feet wire. (Available only in HSE-SBS-15 & 25 litres)

2. **BLUE DIAMOND® GLASS LINING**
   - Blue Diamond® technology increases the life of the inner tank. The lining is stronger and more corrosion resistant than any other in the industry.

3. **GLASS COATED HEATING ELEMENT**
   - Scale and sediment build-up on the surface of the element can lead to premature failure. A. O. Smith Glass Coating helps to prevent scale formation and extends the life of the heating element.

4. **ANODE ROD**
   - The tank has an anode rod which has stainless steel core that is designed to protect the tank from corrosive elements. The anode rod uses a special cathodic action to fight these elements and thus prolong the life of the water heater.

5. **THERMAL CUTOUT**
   - If the water temperature exceeds the highest preset level, the thermal cutout cuts off the power supply to assure safety.

6. **SAFETY VALVE**
   - The safety valve (not seen in picture) is designed to automatically relieve and discharge water, in case the pressure overshoots the preset limits.

7. **FOUR YEARS EXTENDED WARRANTY**
   - The tank carries a 7 years warranty. The heating element has a 2 years warranty that can be extended to 4 years if registered within the first 60 days of purchase. All other parts carry a 2 years warranty. (Warranty applies only if the water heater is purchased from our authorised dealer)
