WHY PEOPLE PREFER AN A. O. SMITH WATER HEATER...

A. O. Smith has been setting new standards for India’s water heater industry.

A. O. Smith India Water Heating Private Limited was established in 2006. Since then, the A. O. Smith team has conducted numerous focus group studies and spent endless research hours determining what India wanted in a water heater. Backed by 75 years of proven technological advances, A. O. Smith India has created a stylish design with features demanded by the Indian consumer.

The A. O. Smith plant with manufacturing facilities spread over 76,000 sq. ft. is located on 20 acres, just outside Bengaluru, in the KIADB Industrial Area, Harohalli. The India operations is the 16th A. O. Smith manufacturing facility worldwide. A. O. Smith’s India plant has extensive engineering and technical resources and has the latest technologies incorporated. A. O. Smith is the first manufacturer to invest in and produce glass-lined water heaters in India.

Today, A. O. Smith Corporation is one of the largest water heater manufacturers in the world and is a global leader in innovative technology and energy efficient solutions.

*Extended Warranty
Registration of Extended Warranty (1 year or 2 years) is valid if customer registers the product within 60 days of purchase. Please call our toll free no. 1.800.103.2468 or fill up the details in our website link (http://www.aosmithindia.com/warranty-form.aspx) to register.

**Guaranteed Service
Different models have different service delivery levels. 1. Service level mentioned for particular model is applicable only for direct service operation cities (refer our website)
2. Service level deliverables are valid up to city municipal limit only
3. Service level may differ in case of public holidays & unavoidable conditions due to national climate, any political & regional regulations.

Featured model HSE-SAS is available in 6, 10, 15 & 25 litres capacities.
### Key Features

1. **Blue Diamond® Glass Lining**
   - Blue Diamond® technology increases the life of the inner tank. The lining is stronger and more corrosion resistant than any other in the industry.

2. **Anode Rod**
   - The tank has an anode rod which has stainless steel core that is designed to protect the tank from corrosive elements. The anode rod uses a special cathodic action to fight these elements and thus prolong the life of the water heater.

3. **Temperature Control Knob**
   - The temperature control knob allows you to set the temperature precisely between 25°C to 75°C.

4. **Thermal Cutout**
   - If the water temperature exceeds the highest preset level, the thermal cutout cuts off the power supply to assure safety.

5. **Safety Valve**
   - The safety valve (not seen in picture) is designed to automatically relieve and discharge water, in case the pressure overshoots the preset limits.

6. **Three Years Extended Warranty**
   - The tank carries a 7 years warranty. The heating element has a 2 years warranty that can be extended to 3 years if registered within the first 60 days of purchase. All other parts carry a 2 years warranty. (Warranty applies only if the water heater is purchased from our authorised dealer)

### Specifications

**HSE-SAS 6, 10, 15 & 25 Litres**
