Temperature Sensing Switch - Adjust SW2 and SW3 in the bank of 8 depending on the unit's specifications. Make sure the switches are set correctly.

Troubleshooting

Gas Pressure Setting

Temperature Sensing Switch - Adjust SW2 and SW3 in the bank of 8 depending on the unit's specifications. Make sure the switches are set correctly.

Error Codes

Dip Switches Settings

Adjust switches 2 and 3 in the bank of 8 depending on your accuracy according to the table below.

The original PCB boards on the water heaters do not have any of the dip switches. Only spare parts PCB boards have this.
