NOTES:
1. Preferred piping layout.
2. The temperature and pressure relief valve setting shall not exceed pressure rating of any component in the system.
3. Service valves are shown for servicing boiler. However, local codes shall govern their usage.
4. A. O. Smith piping method is based on 50 equivalent feet of piping. Boiler placement shall be as close as practical to the storage tank. Applications in excess of these recommendations shall require a licensed engineer for design assistance.
5. Pumps are mounted on rear header of each boiler. (1000-2500)
6. Temperature control probe (quad thermistor probe, P/N 9006905005) must be installed onto the tank, and connected to each boiler.

Legend:
- Temperature & Pressure Relief Valve
- Full Port Ball Valve
- Temperature Control Probe
- Check Valve
- Temperature Gauge
- Drain
- Water Flow Switch
- Expansion Tank
- Cold Water Supply
- System Return
- Alternate Cold Water Connection for "Old-Style" Tank

Genesis Boilers GW (300-2500) - Two Stacked/Two Vertical Storage Tank Recovery System (One Temperature)

Finished Floor

HOT WATER TO FIXTURES

Cold Water Supply

Expansion Tank

System Return

Alternate Cold Water Connection for "Old-Style" Tank
