CODE COMPLIANCE
• The Ultra-Low Nox atmospheric vent commercial gas water heater which meets the thermal efficiency and standby loss requirements of the U.S. Department of Energy and Current Edition ASHRAE/IESNA 90.1.

FULLY AUTOMATIC CONTROLS WITH SAFETY SHUTOFF
• Accurate, dependable control system requires no electric connections. Fixed automatic gas shutoff device for added safety. Not recommended for 180°F sanitizing.

HEAVY GAUGE STEEL JACKET
• Finished with baked enamel over bonderized undercoat.

GLASSLINED TANK
• Maximizes tank life.

FOAM INSULATION
• Saves fuel, helps reduce standby heat loss.

ULTRA-LOW NOX EMISSIONS
• Complies with SCAQMD Rule 1146.2 and other Air Quality Management Districts with similar requirements of 14 ng/J or 20 ppm.

EASY-TO-INSTALL
• Completely factory-assembled. Only gas, water and vent connections need to be made. All connections are located in front and top of heaters for ease-of-installation and service.

DRAFT HOOD
• Low profile draft hood furnished as standard equipment.

COREGARD™ ANODE ROD
• Our anode rods have a stainless steel core that extends the life of the anode rod allowing superior tank protection far longer than standard anode rods.

MAXIMUM WORKING PRESSURE
• 150 psi.

MAXIMUM GAS INLET PRESSURE
• 14” W.C.

HANDHOLE CLEANOUT
• Allows easy tank cleaning.

FEATURES
• Anodic protection
• Equipped with gas pressure regulator
• Integral automatic gas shutoff system prevents excessive water temperature
• CSA Certified and ASME Rated T&P Relief Valve

3-YEAR LIMITED TANK / 1-YEAR LIMITED PARTS WARRANTY
• For complete warranty information, consult written warranty or contact A. O. Smith.
**Commercial Gas Water Heaters**

---

**SPECIFICATION**

Water heater(s) shall be Model ________________ as manufactured by A. O. Smith or an approved equal. Water heater(s) shall be of glasslined design, equipped to burn __________ gas and design certified by UL. Heaters must meet all applicable energy codes and comply with ultra-low NOx emissions of 14 ng/J or 20 ppm. Heaters shall have an input rating of _______ BTU/H and a recovery capacity of ________ GPH at a temperature rise of 100°F with a storage capacity of _______ gallons. Heater shall be equipped with a 2-3/4" x 3-3/4" boiler-type handhole cleanout and shall have a working pressure of 150 psi. Heater(s) shall be provided with an automatic gas shutoff device and safety shutoff in event pilot flame is extinguished; a gas pressure regulator set for the type of gas supplied; an approved draft hood, and extruded anode rod rigidly supported for cathodic protection. A CSA Certified and ASME Rated T&P Relief Valve shall be furnished and installed by the manufacturer. The tank shall be foam insulated. The outer jacket shall have a baked enamel finish over a bonderized undercoating. Fully illustrated instruction manual and parts list to be included. All internal surfaces of the heater(s) exposed to water shall be glasslined with an alkaline borosilicate composition that has been fused-to-steel by firing at a temperature range of 1400° to 1600°F. Heater shall have a three year limited tank and one year limited parts warranty against corrosion and tank failure due to sediment build-up as outlined in the written warranty. Heater(s) shall be design certified by UL. Operation of the heater in a closed system where thermal expansion has not been compensated for with a properly sized expansion tank will void the warranty.
