FROM THE LEADERS IN COMMERCIAL WATER HEATING, WE BRING YOU:

Commercial-Grade Water Heaters for the Home

ProLine® Family

A. O. Smith ProLine® Family
Commercial-grade components. Commercial-grade water heaters.

OPERATING COST
$$
$ $

INSTALLATION SPACE REQUIRED

WARRANTY (YEARS)
6 8 6-15

PREMIUM FEATURES:

- Blue Diamond® Glass Coating**
- DynaClean® Automatic Sediment-Cleaning System**
- Self-Powered Electronic Gas Valve*
- Heat Trap Nipples**
- Enhanced Flow Brass Drain Valve**
- CorGuard® Advanced Anode Rod Protection**

Energy Saving

Double Long Life Elements***

Electronic User Interface

Condensing Combustion*

Continuous Flow*

Cutting-Edge Technology

Industry-Leading Efficiency

Our new ProLine® Master Series 8-year water heater is your tool to offer unique new benefits to your customers and to increase the profitability of your business.

Hot Water Output, Cost of Operation & Installation Space Required estimated based on typical applications/installations.

For a more custom analysis of unique installations, visit hotwater.com and use our product selector tool.

Our new ProLine® Master Series 8-year water heater is your tool to offer unique new benefits to your customers and to increase the profitability of your business.
COMMERCIAL-GRADE STAINLESS STEEL CORE ANODE RODS
A. O. Smith’s CoreGard™ Anode Protection is provided using anode rods that feature a stainless steel center core that allows the anode to be secured in place, extending the life of the tank. Stainless steel core technology is the same that is used in our industry-leading commercial product line.

COMMERCIAL-GRADE GLASS TANK LINING
A. O. Smith’s Blue Diamond® glass coating is a patented commercial-grade formula that provides superior rust protection and corrosion resistance compared to the industry standard glass lining. Blue Diamond glass coating blend is formulated in the same lab that creates the protection for our industry-leading commercial product line. Through our long history, we’ve learned that one size rarely fits all. That’s why we customize our signature formula to best meet the needs of every water heater we produce, ensuring long life no matter which A. O. Smith model you choose.

COMMERCIAL-GRADE THERMOSTATS
A. O. Smith’s ProLine products are outfitted with thermostats that are the same as those used in our industry-leading commercial line.

COMMERCIAL-GRADE ELECTRIC ELEMENTS
ProLine Master electric products are outfitted with longer-lasting stainless steel upper and lower elements that are available after those used in our industry-leading commercial line.

COMMERCIAL-GRADE FACTORY-INSTALLED PIPE NIPPLES
A. O. Smith’s heat trap metal nipple reduces standby heat loss includes commercial-grade PEX lining and zinc coatings. These nipples are the same as those used in our industry-leading commercial product line. They are factory-installed on most models, making water heater installation quicker and easier.

COMMERCIAL-GRADE DYNACLEAN™ AUTOMATIC SEDIMENT-CLEANING SYSTEM
Automatic self-cleaning action greatly reduces sediment accumulation and maximizes hot water output.

COMMERCIAL-GRADE STAINLESS STEEL CORE ANODE RODS
A. O. Smith’s CoreGard™ Anode Protection is provided using anode rods that feature a stainless steel center core that allows the anode to be secured in place, extending the life of the tank. Stainless steel core technology is the same that is used in our industry-leading commercial product line. ProLine Master products have increased anode protection with either longer or multiple anodes, depending on model.

COMMERCIAL-GRADE DYNACLEAN™ AUTOMATIC SEDIMENT-CLEANING SYSTEM
Automatic self-cleaning action greatly reduces sediment accumulation and maximizes hot water output.

COMMERCIAL-GRADE PEX DIP TUBES
A. O. Smith’s PEX cross-linked polymer dip tubes are long-lasting with superior resistance to destructive thermal deterioration and can withstand temperature excursions up to 400 degrees. PVC is the same material used in dip tubes found in our industry-leading commercial product line.

COMMERCIAL-GRADE BRASS DRAIN VALVES
A. O. Smith’s brass drain valve is a fail-safe temper-resistant design that is faster setting than other valve designs. The high-tech valve is the same as those used in our industry-leading commercial product line.

COMMERCIAL-GRADE FACTORY-INSTALLED PIPE NIPPLES
A. O. Smith’s heat trap metal nipple reduces standby heat loss includes commercial-grade PEX lining and zinc coatings. These nipples are the same as those used in our industry-leading commercial product line. They are factory-installed on most models, making water heater installation quicker and easier.

COMMERCIAL-GRADE ECONOMICAL PIPE NIPPLES
A. O. Smith’s economical cross-linked PEX dip tubes are long-lasting with superior resistance to destructive thermal deterioration and can withstand temperature excursions up to 400 degrees. PVC is the same material used in dip tubes found in our industry-leading commercial product line.

COMMERCIAL-GRADE STAINLESS STEEL CORE ANODE RODS
A. O. Smith’s CoreGard™ Anode Protection is provided using anode rods that feature a stainless steel center core that allows the anode to be secured in place, extending the life of the tank. Stainless steel core technology is the same that is used in our industry-leading commercial product line. ProLine Master products have increased anode protection with either longer or multiple anodes, depending on model.
