

Ac-U-Temp HOT WATER SUPPLY SYSTEMS

The "TOTAL SYSTEM" Concept - We have taken our highly efficient equipment and created a convenient package; a complete domestic hot water system.

FEATURES

SIMPLIFIES INSTALLATION

- The installer simply connects the flue, gas, electric supply, cold water make-up, and hot water supply (Building return loops connect to cold water make-up.)

ELIMINATES COSTLY FIELD ERRORS

- These complete hot water systems are factory-engineered and assembled to assure proper pipe, pump and wiring sizing
- Systems are pre-piped and wired to guarantee maximum system efficiency

FACTORY TESTED

- Each Ac-U-Temp system is hydrostatic and fire tested before shipping from the factory

AC-U-TEMP STORAGE TANKS

- Each Ac-U-Temp storage tank is especially designed with tank opening locations that provide maximum tank draw efficiency and eliminate any unnecessary piping and connections
- The Ac-U-Tanks are factory standard with the same superior glass lining that has set new standards for the tank industry
- Tank capacities range from 80 gallons to 5,000 gallons (other tank sizes available)

OTHER FEATURES

- ASME Temperature and Pressure Relief Valve 125#
- Tank Temperature Sensor
- Tank Thermometer
- Isolation Valves (Reliable Ball Valves)
- Superior Channel Iron Skid
- 125 PSI Tank Construction
- Factory sized and supplied pump

OPTIONS

- Sequencing Control Panel (For Multi-Unit systems)
- 125, 150 and 160 PSI tank construction options, depending upon the size of the tank
- 12" x 16" Manholes
- Cement and Epoxy Tanks Linings

CUSTOM AC-U-TEMP SYSTEMS

- All Ac-U-Temp Systems are built-to-order, and can be precisely designed to specifically meet your specifications
- Many combinations of heaters and tanks are available. Consult your local A. O. Smith Representative for factory assistance.

MULTI-UNIT SYSTEMS

- High recovery systems that can meet any hot water demand
- Systems can be designed to provide 50 to 100% back-up
- Heaters can be on & off fired, or sequenced to meet changing system demands
- Sequenced multi-unit systems that employ relatively small storage tanks are ideal for applications with constant, yet fluctuating hot water demands

MULTI-TANK SYSTEMS

- For applications with low ceiling heights or unique installation challenges

OPTIONAL DUAL ENERGY SOURCE CAPABILITY

- Ac-U-Temp storage tanks can be specified with heat exchangers; allows winter/summer heating operation
- Both, water-to-water, or steam-to-water heat exchangers are available in both single wall and double wall
- Complete control packages can be factory installed for hook-up and run capability
- Electric Back-up-Heavy-duty electric water heater elements and controls can be specified for up to 900 KW; 100% electric back-up
- Provides hot water even during natural gas curtailments

LIMITED WARRANTY

- Refer to the water heater and storage tank warranty. One year limited parts and labor warranty on all other factory installed system components.

Attention: Significant changes have been made to some models. Please note that this spec sheet refers specifically to models manufactured in Lebanon, TN

COMMERCIAL

HOT WATER SUPPLY SYSTEMS

CUSTOM PACKAGED SOLUTIONS

AO Smith will work with you to configure and assemble the components and framing to meet your specific water heating and site needs. You can configure systems using:

- XP
- XP Plus
- Tankless rack
- Burkay Genesis
- Burkay circulating water heaters
- VF - Variable Fire

SPECIFICATIONS - STEAM TO WATER

The Hot Water Supply System - shall consist of A. O. Smith Ac-U-Temp® factory assembled system Model No. _____. System shall be completely factory assembled and shall include the A. O. Smith copper heat exchanger circulating water heater(s), with input of _____ BTU/H for _____ gas and recovery capacity of _____ gph, and the A. O. Smith glass-lined (cement/epoxy) hot water storage tank with _____ gallons capacity for _____ mounting (vertical-horizontal). System shall include properly sized circulator, inlet and outlet thermometers, tank temperature thermometer, relief valve, and tank temperature control. Entire system shall be rigidly mounted on welded steel skid base and shipped assembled to job site (Ac-U-Temp systems employing tanks too large for shipping as an assembled unit, will be shipped with the tank mounted on a split bolt-together skid).

See HW Circulating Water Heater Specification Sheet or go to www.hotwater.com.

Circulating Water Heater(s) and storage tank(s) shall have a 5 year limited warranty against corrosion as outlined in the written warranty.

NOTE: Custom supply systems also available, consult factory.
